Subject: Jim Hanley's time with UIC

Douglas,

I think your proposal sounds great. It seems like that would be a perfect fit for Jim to help with the ESA & NHPA part of the Dewey Burdock work. I would really like to have him review the Class III permit & SOB, too. In order to do the ESA & NHPA work, he would need to become more familiar with our UIC requirements for the project, so I think starting out with reviewing the Class III permit & SOB would get him off to a good start. He could review the Class III permit application as needed to provide additional background info while reviewing the permit & SOB. That review would help focus his review of the Draft SEIS to get the info he needs for the ESA & NHPA work.

As for any follow-up assistance with the Preliminary Assessment, I think Superfund might ask for help reviewing what the contractor is doing to make sure they aren't missing anything. That would be a good fit for Jim, too. I think they will probably also ask Lisa Lloyd from NEPA to help with that, too, since she is getting up to speed on the Dewey Burdock SEIS.

Then I can focus on addressing internal review comments, planning for the internal briefings & logistics for the public hearings.
